

PRATAP YADAV

Frontend Developer | Full Stack Developer | MERN Stack Developer

Nepal | yadavsugam347@gmail.com | +977-9813771539

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Frontend and MERN Stack Developer with hands-on experience designing, building, and deploying responsive, scalable, production-ready web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in building modern user interfaces, developing RESTful APIs, integrating databases, implementing authentication systems, and deploying applications through Git-based workflows. Focused on writing clean, maintainable code and continuously learning modern web technologies to deliver high-quality software solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python, C++, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Framer Motion, GSAP, Redux Toolkit, React Router

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Multer

Database: MongoDB, Mongoose, MySQL

Tools & Platforms: Git, GitHub, Linux, VS Code, Postman, Figma, Vercel, Render

Core Concepts: OOP, Data Structures & Algorithms, MVC Architecture, API Integration, State Management, Authentication & Authorization, Responsive Design, Performance Optimization

PROJECT EXPERIENCE

Personal Portfolio Website | *React.js, Tailwind CSS, Framer Motion, Vercel*

- Built and deployed a fully responsive developer portfolio showcasing projects, skills, and professional experience.
- Developed reusable React components to improve scalability, maintainability, and code consistency.
- Integrated smooth page transitions and interactive animations using Framer Motion to enhance user engagement.
- Optimized site performance, accessibility, SEO, and cross-browser compatibility; deployed via GitHub-based CI/CD on Vercel.

MERN Blogging Platform | *React.js, Node.js, Express.js, MongoDB*

- Built a full-stack blogging platform with secure JWT authentication and role-based authorization.
- Designed RESTful APIs with Express.js and integrated MongoDB via Mongoose for efficient data management.
- Implemented blog publishing, editing, deletion, image upload, search, and category-based filtering.
- Built an admin dashboard with reusable React components for content management, applying responsive UI principles throughout.

GTA VI-Inspired Landing Page | *React.js, Tailwind CSS, GSAP, Framer Motion*

- Developed a high-performance animated landing page using advanced GSAP animations, smooth scrolling, and interactive transitions.
- Optimized layouts for desktop, tablet, and mobile while maintaining strong performance.
- Structured reusable UI components to improve maintainability and scalability.

TaskUnity — Collaborative Project Management Platform | *React.js, Node.js, Express.js, MongoDB*

- Built a collaborative task management platform enabling teams to create, organize, assign, and track project tasks; served as Schedule Manager for the 5-person team.
- Designed Kanban-style workflows with task prioritization, deadlines, and progress tracking.
- Implemented secure authentication and RESTful APIs for frontend-backend communication, and debugged MongoDB Atlas connectivity and authentication issues.

Blockchain-Based E-Voting System | *Final-Year Research Project — Solidity, Blockchain, DAO*

- Designed a decentralized e-voting system using DAO governance principles to improve election transparency and integrity.
- Conducted literature review and system analysis to identify challenges in traditional voting systems.

- Proposed secure vote validation, immutable vote storage, decentralized governance, and transparent vote-counting mechanisms, with supporting feasibility and architecture documentation.

Hotel Reservation Management System | Java, MySQL

- Built a desktop application for room booking, customer management, and billing operations.
- Designed relational database schemas in MySQL for efficient data storage and retrieval.
- Applied object-oriented design principles and booking validation to streamline reservation workflows.

EDUCATION

B.Sc. (Hons) Computer Science & Software Engineering

University of Bedfordshire | 2026

Higher Secondary Education (+2)

Premier Secondary College |

ACHIEVEMENTS

- Designed and deployed multiple full-stack web applications using the MERN technology stack.
- Built responsive, production-ready React applications with a strong focus on performance and user experience.
- Experienced with Git-based version control, collaborative development workflows, and cloud deployment via Vercel.
- Strong understanding of RESTful API development, authentication systems, responsive design, and modern JavaScript practices.
